Summary

First-year CSE student at SRM University skilled in C++, JavaScript, React.js, Next.js, SQL, and DSA, seeking SDE, frontend, or full-stack development internships.

Skills

Programming: C++, Python, JavaScript
Web: HTML, CSS, React.js, Next.js
Tools: Git, GitHub, VS Code, Vercel
Database: MySQL, MongoDB

Certifications

• HackerRank SQL (Advanced) | 2026 | Verify
• Google Cloud Generative AI Fundamentals Skill Badge | 2026 | Verify

Experience

Open Source Contributor | Jun 2026 – Present

- Resolved AlgoForge issue #17 by improving the code execution console: cleared stale output on re-run, added running-state feedback, manual clear control, and auto-scroll behavior; PR #41 merged.
- Prevented stored HTML from running in Open Mercato map popups by rendering plot names as text; PR #9068.
- Preserved person-company links and later primary-company selections when undoing changes; PR #8827.
- Removed the hard-coded admin email fallback from onboarding notifications and blocked demo feedback when demo mode is disabled; PR #9177.

Projects

Grillr – AI-Powered Mock Interview Platform 🔗 Live Demo 🔗GitHub
Next.js, React, TypeScript, FastAPI, PostgreSQL, Supabase, WebSockets

- Built a full-stack AI interview coach that conducts real-time voice-based mock interviews with adaptive, context-aware follow-up questions.
- Engineered a real-time speech pipeline (STT → LLM → TTS) over WebSockets with live interruption handling and an evaluation engine scoring relevance, clarity, and technical accuracy.
- Designed role-specific interview modes (Behavioral, Technical, System Design, HR) with resume/JD-based question generation and retry-based coaching.

DEADLOCK – AI-Powered Failure Intelligence System 🔗 Live Demo 🔗GitHub
Next.js, TypeScript, Tailwind CSS, DeepSeek R1, OpenRouter, Vercel

- Built an AI-powered multi-agent platform that analyzes user goals, identifies risks, and generates actionable recovery strategies across 5 expert-agent workflows.
- Developed risk assessment, agent debate, failure simulation, and future outcome analysis pipelines using DeepSeek R1 via OpenRouter APIs.
- Designed and deployed a responsive web application on Vercel with a modern dashboard and smooth user experience.

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering
SRM University Delhi NCR | 2026–2030
